Organizes
A Webinar on

'Learning the Philosophy of Success - A Key Aspect in Personality Development'

Abstract:

Success is basically a very subjective idea and it differs from person to person. However, success is something which takes us through the path of progress that leads to the goal envisaged by us as a purpose of our life. Whatever may be the idea of success for different people, it is necessary for all of us to develop a positive attitude along with dedicated efforts to reach a desired destination. Choosing the right path, working in the right direction with 'never-quit attitude' and putting all possible efforts in a planned manner constitute the philosophy of success. Success can be a dream of a few moments but it takes us years together to fulfill that dream. This webinar is intended to impart a new insight to our students and faculty in regard to the achievement of success.
